Our garments are handcrafted with care, which may result in slight measurement variations: ±0.5 inches for smaller measurements and ±1 inch for larger measurements.

All designs were originally created using metric measurements (cm) and converted to inches. While we strive for accuracy in conversion, slight variations may occur.

Listed measurements represent the garment's dimensions when laid flat on a surface. These are not body measurements or size recommendations. Please compare these garment measurements with clothing that fits you well for the most accurate size selection.
